The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanson et al (5,201,185). Hanson discloses a defrost method in which if the heat exchanger temperature sensor is in a failure state the defrost execution determination condition is altered and the defrost termination condition is changed from the normal defrost termination condition (see col. 10, line 35 to col. 11, line 34).

Claims 4-6 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-10 are allowed.
